

Source Modifications

14.0 to 14.0.1

Updated Source/LK9/L92/OFP3_ELFE_1D.f90 to place OGEL writes bush results regardless of the type of bush

AUTOSPC Modification (approx 9/2021)

MYSTRAN previously used 1.0E-06 for the AUTOSPC default value. However, developers agreed that 1.0E-08 is a better choice, which is consistent with other commercial NASTRAN solvers.

In "Source/Modules/PARAMS.f90" ONEPM8 defines the AUTOSPC value

In "Source/Modules/CONSTANTS_1.f90" ONEPM8 is defined to be 1.0E-08_QUAD

PARAM,DELBAN

Deletes the Bandit files

1.) Source/Interfaces/BD_PARAM_Interface.f90 where other subroutines can read the types of all parameter entities.

2.) Source/LK1/L1A-BD/BD_PARAM.f90 which processes the PARAM bulk data cards

3.) Source/Modlues/PARAMS.f90 where you define and comment the default value of your parameter, and describe what it does.
